**HUMAN FACTORS ENGINEERING OF
SOFTWARE USER INTERFACES**

PART 5: VISUAL PRESENTATION AND USE OF COLOR

Table of Contents

1	Introduction	371
2	Scope	372
3	Normative References	372
4	Definitions	373
5	Presentation of Information	374
5.1	<i>Organization of information</i>	375
5.1.1	Location of information	375
5.1.2	Areas.....	375
5.1.3	Input/output area	375
5.1.4	Groups.....	376
5.1.5	Lists	379
5.1.6	Tables	381
5.1.7	Labels	383
5.1.8	Fields	385
5.2	<i>Graphical objects</i>	386
5.2.1	General recommendations for objects	386
5.2.2	Cursors and pointers	387
5.2.3	Icons	388
6	Coding of Information	390
6.1	<i>General recommendations</i>	391
6.1.1	Distinctiveness of codes	391
6.1.2	Consistent coding	391
6.1.3	Meaningfulness	391
6.1.4	Access to meaning of code.....	391
6.1.5	Use of standards or conventional meaning	392
6.1.6	Rules of code construction.....	392
6.1.7	Removal of codes.....	392
6.2	<i>Alphanumeric coding</i>	392
6.2.1	Character strings.....	392
6.2.2	Alphabetic vs. numeric codes.....	392
6.2.3	Use of uppercase	393
6.2.4	Abbreviations for alphanumeric codes.....	393
6.3	<i>Graphical coding</i>	393
6.3.1	Limiting the number of graphical codes	394
6.3.2	Construction of icons	394
6.3.3	Three-dimensional coding.....	394

6.3.4	Geometric shapes	394
6.3.5	Line coding	394
6.4	Color coding.....	395
6.4.1	Redundant coding.....	395
6.4.2	Coding to Accommodate.....	395
6.4.3	Color limits for categorization	395
6.4.4	Legend availability	396
6.4.5	Redundant coding for legends	396
6.4.6	Reuse of color	397
6.4.7	Mapping color to meaning.....	397
6.4.8	Overuse of color	400
6.5	Coding with other visual techniques.....	400
6.5.1	Special symbols for markers	401
6.5.2	Alternative techniques.....	401
6.5.3	Unique use of symbols for markers	401
6.5.4	Positioning of markers	401
6.5.5	Blink coding	402
6.5.6	Size coding.....	402
6.5.7	Luminance (brightness) coding.....	403
6.5.8	Relative Lightness Levels	403
6.5.9	Image polarity reversal	403
6.5.10	Underlining.....	403
7	Use of Color.....	403
7.1	General	403
7.1.1	Explicit design goals.....	403
7.1.2	Monochrome monitors	404
7.1.3	Limiting the number of colors.....	404
7.1.4	Color limits for recall	404
7.1.5	Color limits for visual search	405
7.1.6	Accurate color identification.....	405
7.1.7	Size of character strings, data fields, and symbols	406
7.1.8	Accurate color discrimination	407
7.1.9	Object position	407
7.1.10	Object separation	408
7.1.11	Unintended blending.....	408
7.1.12	Highlighting task areas.....	408
7.2	Color selection.....	408
7.2.1	Foreground and background colors for text.....	408
7.2.2	Continuous reading	409
7.2.3	Chromostereopsis.....	409
7.2.4	Depth effects.....	409
7.2.5	Size and the use of blue	410
7.2.6	Blue and information display	410
7.2.7	Blue and red on dark backgrounds.....	410
7.2.8	Spectrally extreme colors.....	410
7.2.9	High saturation background	411
7.2.10	Improved color identification	411
7.2.11	Distinguishable colors.....	411

7.2.12	Luminance contrast	412
7.2.13	Contrast enhancement	412
7.2.14	Control.....	412
7.2.15	Realistic colors	413
7.3	<i>Special Uses</i>	413
7.3.1	Drawing attention	413
7.3.2	Restricted use of warning colors	414
ANNEX A: REFERENCE MATRIX FOR ISO 9241-12		415
