

Reviews of Human Factors and Ergonomics, Volume 5
Edited by Francis T. Durso
ISBN 978-0-945289-35-7

CONTENTS

Preface: Use-Inspired Basic Research

Francis T. Durso

Chapter 1. Performance in Nursing

Patricia R. DeLucia, Tammy E. Ott, & Patrick A. Palmieri

Nurses and the Work They Perform
How Is Nursing Performance Measured?
What Is the Nature of Nursing Errors?
Cognitive Factors That Affect Nurse Performance
Physical Factors That Affect Nurse Performance
Organizational Factors That Affect Nurse Performance
Future Directions
References

Chapter 2. Human Factors of Information Visualization

George Robertson, Mary Czerwinski, Danyel Fisher, & Bongshin Lee

Major Information Visualization Principles
Major Information Visualization Techniques
Use of Animation in Visualization
Information Visualization for Large Displays
Evaluation of information Visualizations
Conclusions
References

Chapter 3. Aviation Automation: General Perspectives and Specific Guidance for the Design of Modes and Alerts

Amy R. Pritchett

A Quick Tour of the Modern Flight Deck
Perspectives on Flight Deck Automation
Analysis and Design of Modal Automation
Analysis and Design of Alerting Automation
Certification, Testing, and Evaluation of Aviation Automation
Summary of Design Considerations
References

Chapter 4. Intercepting Moving Objects: Fundamental Principles Learned From Baseball

Rob Gray

Visual Information Available to a Baseball Player

Use of Visual Information in the Performance of Particular Baseball Skills

Conclusions

Acknowledgments

References

Chapter 5. Expertise: Acquisition, Limitations, and Control

Stephan Lewandowsky & Jacqueline L. Thomas

The Acquisition of Expertise and Its Characteristics

The Limitations of Expertise

Expertise and Conscious Control

Conclusion and Outlook

Acknowledgments

References

Chapter 6. Principles for Designing Effective and Efficient Training of Complex Cognitive Skills

Fred Paas & Tamara van Gog

Training Tasks

Fixed Training Sequences

Adaptive/Personalized Training Sequences

Evaluating Training Effectiveness and Efficiency

Conclusions

References

Chapter 7. Augmented Cognition: An Overview

Kay Stanney, Dylan Schmorrow, Matthew Johnston, Sven Fuchs, David Jones, Kelly Hale, Ali Ahmad, & Peter Young

Adaptive Automation

Cognitive State Sensors

Human-Systems Adaptations

Control Frameworks

Conclusions

References

Chapter 8. A History and Primer of Human Performance Modeling

Michael D. Byrne & Richard W. Pew

General Issues in Human Performance Modeling

Models of Perception and Attention

Models of Action and Motor Performance

Models of Memory and Cognition

Integrated Models

Conclusions and Future Directions

References
