

Organizational Listing

This listing of technical and professional societies and government agencies is provided as a resource to aid the human factors and ergonomics practitioner. The organizations listed appear to have an interest in the area of human factors, ergonomics, and human performance; though this may not be their sole focus. The depth and breadth of each organization has not been thoroughly examined. In addition, many of these organizations produce standards (standards, handbooks, guides, best practices, recommended practices, etc.) that may be of use to the human factors and ergonomics discipline.

The listing is as accurate as the various indexes, data bases, and web sites that were used as sources. This listing is by no means complete; suggestions for additions or corrections are always welcome, and should be sent to aposton86@gmail.com
