

US TAG to ISO TC 159

The U.S. Technical Advisory Group (TAG) to ISO TC 159 is the U.S. "mirror group" to ISO Technical Committee (TC) 159 - Ergonomics. As such, it is responsible for providing the U.S. position with respect to all documents developed within TC 159. It may also propose work items and draft documents for consideration by working groups within the ISO Technical Committee. The structure of the U.S. TAG, including relevant contact information for its Subcommittee TAG Chairs, is provided below.

Note that Working Groups are generally aligned under their associated ISO Subcommittees. The exception to this ISO TC 159 WG2 – Ergonomic Requirements for People with Special Needs. Because the subject matter of this working group crosses the various TC 159 subcommittees, it is linked directly with TC 159 itself. Those interested in contributing to this working group should contact Daryle Gardner-Bonneau, the U.S. TAG Chair for ISO TC 159.

Legend
TAG = Technical Advisory Group
TC = Technical Committee
SC = Subcommittee
WG = Working Group
JWG = Joint Working Group
